Elevate Your Expectations.

Port City Elevator, Inc. is the premier provider of residential elevators, platform lifts, dumbwaiters, stairlifts, and accessibility equipment in the Coastal Carolinas. As a licensed and insured provider, we bring over 20 years of combined experience in working with architects, general contractors, home owners, and planners to ensure the right product is installed to meet your needs.

Port City Elevator, Inc. is committed to its customers, to its people, and to the leading manufacturers that partner with us. To provide such a level of customer service, we believe that having a dedicated and well-trained staff is the first step of achieving that goal. Considered “best in class,” our team is very professional, highly trained and dedicated to meeting your needs. They are not only good at what they do, they care about how it gets done. The only thing better than the amazing products and services found at Port City Elevator is the amazing people behind them.

Port City Elevator works with leading manufacturers of indoor and outdoor lift solutions for the home, school, church or office. Our knowledgeable staff will consult with you to find the right product to fit your needs.

Residential Elevators

We specialize in one-of-a-kind and custom residential elevators to meet each customer's specific need.

Lula Elevators

The Elvoron LU/LA Elevator (also known as the LULA Elevator) is a limited use, limited application commercial elevator designed for low-rise situations.

PVE Elevator

The unique design of the vacuum elevator is an ideal choice for any retrofit or new construction project without the consuming footprint of a traditional home elevator. The innovative design does not require any pre-construction shaft, pit or machine room.

Dumbwaiters

Our residential dumbwaiters are available in powder-coated steel, or stainless steel cars, with a lift capacity of 100 or 200-pound net loads.

Stair Lifts

Whether your staircase is straight, curved, or has a 90-degree turn, we can develop a solution for navigating it in safety and comfort.

Platform Lifts

Platform lifts create convenient access without compromising architectural character.

Whether you are planning a new home or need to access other floors in a current building,

Port City Elevator can take you to the next level. We offer great service and accessibility for you, and your home or business. From our initial contract through the servicing process, we will take a hands-on approach to ensure your goals are met.

Because we are a premier local provider, our customers have the ability to contact any member of our team that is associated with their project. Every job we encounter has its own set of challenges, but we can break each job into four stages:

1 Design

Our dedicated sales team will listen to your specific job requirements and offer several solutions based on your needs and goals. After establishing the correct product is specified, we will evaluate the jobsite conditions. At this time, we will be working in conjunction with a number of tradesmen to make sure the installation goes off as planned.

2 Staging

Your equipment will be manufactured based on jobsite evaluations and communications with the appropriate trades. Routine jobsite visits will continue to verify that the equipment will be installed in an environment as required, and that it meets all building codes. Once the jobsite is ready, the equipment will be delivered and the installation process will begin.

3 Installation

Our well-trained installation team will deliver the equipment and begin the installation the same day. Our team will show up with the appropriate tools and items to protect other areas of your home or building while the installation is in process.

4 Servicing

Once the installation and all required inspections are complete, a member of our team will go over the correct and safe operation of your new equipment. At this time routine maintenance practices will be reviewed as well.
